Pasito Electronics 28915 Adohr Ln., Suite N, O, Camarillo, CA 93012 4820 Adohr Ln., Suite N Camarillo, CA 93012

Dear Environmental Manager:

Subject: Stormwater Program – State Industrial Permit

Location: 4820 Adohr Ln. (SIC Code # 3699)

As you are aware from previous City correspondence, the State Water Resources Control Board (SWRCB) requires the City of Camarillo to determine which industries in our jurisdiction may discharge either directly to surface waters or indirectly through municipal separate storm sewers, and may be subject to the **State General Industrial Permit No. CAS000001, Board Order 2014-0057-DWQ** (State Permit). This permit was recently renewed and becomes effective July 1, 2015. The permit has several new requirements. Please review the attached information and/or visit the SWRCB's website at

http://www.waterboards.ca.gov/water\_issues/programs/stormwater/industrial.shtml for more detailed information on the permit.

In the subject line of this letter, we have listed the applicable Standard Industrial Classification code (SIC) as listed in our records that describes the operations at your facility. These are the codes the SWRCB uses to identify facilities subject to the State General Industrial Permit (permit). Currently those facilities subject to the permit include manufacturers, mining operations, landfills, steam generating electricity, transportation, recycling facilities, oil and gas facilities and hazardous waste facilities. If your facility falls into one of those categories/SIC codes, you must file a Notice of Intent, submit other registration documentation and pay the current annual fee of \$1,791 for coverage under the Permit by July 1, 2015 (see attached information for details on how to file). If your facility can certify that you have no industrial materials or equipment exposed to storm water and you currently are not under the State Permit, you are allowed to submit documentation certifying no exposure to the State, and pay the annual fee which is currently \$200. The No Exposure Certification (NEC) must be completed by October 1, 2015 to avoid penalties; the NEC is now an annual requirement. Please see the attached brochure for more details on the NEC.

The City of Camarillo is required to inspect facilities that are subject to the State Industrial Permit twice during a five year period and we will be visiting your facility before June 30, 2015 to conduct an inspection and provide you with further information on the new permit. To assist with our inspection, we would appreciate your completing and returning the enclosed questionnaire by May 1, 2015. Further, in 2014 the City of Camarillo's fee resolution was revised and the industrial inspection fee is currently \$383, which will be invoiced separately after the inspection is conducted.

Please contact me at 805-312-2239 or akuhlman@cityofcamarillo.org if you have any questions regarding the permit. Thank you for your attention to this matter.

Sincerely,

Anita Kuhlman Stormwater Program Manager

# City of Camarillo

601 Carmen Drive • P.O. Box 248 • Camarillo, CA 93011-0248

June 15, 2015

Dear

Subject: Notice of Violation – State Industrial Permit

Location: , Camarillo (SIC Code #

As you are aware from our previous communications, the State Water Resources Control Board (SWRCB) has mandated that the City of Camarillo determine which industries in our jurisdiction may discharge either directly to surface waters or indirectly through municipal separate storm sewers, and may be subject to the **State General Industrial Permit (IGP)**No. CAS00001 (Waste Discharge Requirements for Discharges of Stormwater associated with Industrial Activities Board Order 2014-0057-DWQ). On and again on a city representative inspected your facility and determined that it is subject to the State Industrial Permit. You were notified by the inspector during both inspections of the need to file a Notice of Intent (NOI) for coverage under the Permit.

As of June 15, 2015, the city has not received confirmation of your filing an NOI for *insert facility*. Failure to seek coverage under the IGP could result in a mandatory minimum penalty of not less than \$5,000 per year of noncompliance pursuant to California Water Code sections 13399.30 and 13399.33. In addition, industrial facilities that discharge industrial stormwater without coverage under the new IGP are subject to fines up to \$10,000 per day of violation and \$10 per gallon of Stormwater discharge pursuant to section 13385.

If you have filed an NOI for coverage, please mail a copy of the NOI or the State Water Resources Control Board approval notice and Waste Discharge ID # (WDID) to my attention at the City of Camarillo. If you have not filed an NOI, the City is mandated by our Municipal Stormwater Permit to notify the Los Angeles Regional Water Quality Control Board (LARWQCB). If the city does not receive a copy of the NOI or Receipt of NOI letter/WDID # by July 1, 2015, the City will need to notify the LARWQCB of the failure to file.

For further information on the State Industrial Permit, please visit the following web site: <a href="http://www.waterboards.ca.gov/water">http://www.waterboards.ca.gov/water</a> issues/programs/stormwater/industrial.shtml. Thank you for your attention to this matter. If you have any questions or would like to discuss this further, please call me at 805-383-5659.

Sincerely,

Anita Kuhlman Stormwater Program Manager
