Camarillo, CA 93012

Dear Environmental Manager:

Subject: **Stormwater Program – State Industrial Permit**
Location: **4820 Adohr Ln.** (SIC Code # **3699**)

As you are aware from previous City correspondence, the State Water Resources Control Board (SWRCB) requires the City of Camarillo to determine which industries in our jurisdiction may discharge either directly to surface waters or indirectly through municipal separate storm sewers, and may be subject to the **State General Industrial Permit No. CAS000001, Board Order 2014-0057-DWQ** (State Permit). This permit was recently renewed and becomes effective July 1, 2015. The permit has several new requirements. Please review the attached information and/or visit the SWRCB's website at http://www.waterboards.ca.gov/water_issues/programs/stormwater/industrial.shtml for more detailed information on the permit.

In the subject line of this letter, we have listed the applicable Standard Industrial Classification code (SIC) as listed in our records that describes the operations at your facility. These are the codes the SWRCB uses to identify facilities subject to the State General Industrial Permit (permit). Currently those facilities subject to the permit include manufacturers, mining operations, landfills, steam generating electricity, transportation, recycling facilities, oil and gas facilities and hazardous waste facilities. If your facility falls into one of those categories/SIC codes, you must file a Notice of Intent, submit other registration documentation and pay the current annual fee of \$1,791 for coverage under the Permit by July 1, 2015 (see attached information for details on how to file). If your facility can certify that you have no industrial materials or equipment exposed to storm water and you currently are not under the State Permit, you are allowed to submit documentation certifying no exposure to the State, and pay the annual fee which is currently \$200. The No Exposure Certification (NEC) must be completed by October 1, 2015 to avoid penalties; the NEC is now an annual requirement. Please see the attached brochure for more details on the NEC.

The City of Camarillo is required to inspect facilities that are subject to the State Industrial Permit twice during a five year period and we will be visiting your facility before June 30, 2015 to conduct an inspection and provide you with further information on the new permit. To assist with our inspection, we would appreciate your completing and returning the enclosed questionnaire by May 1, 2015. Further, in 2014 the City of Camarillo's fee resolution was revised and the industrial inspection fee is currently \$383, which will be invoiced separately after the inspection is conducted.

Please contact me at 805-312-2239 or akuhlman@cityofcamarillo.org if you have any questions regarding the permit. Thank you for your attention to this matter.

Sincerely,

Anita Kuhlman
Stormwater Program Manager

City of Camarillo

601 Carmen Drive • P.O. Box 248 • Camarillo, CA 93011-0248

June 15, 2015

Dear

Subject: **Notice of Violation – State Industrial Permit**
Location: _____, **Camarillo** (SIC Code # _____)

As you are aware from our previous communications, the State Water Resources Control Board (SWRCB) has mandated that the City of Camarillo determine which industries in our jurisdiction may discharge either directly to surface waters or indirectly through municipal separate storm sewers, and may be subject to the **State General Industrial Permit (IGP) No. CAS000001** (Waste Discharge Requirements for Discharges of Stormwater associated with Industrial Activities Board Order 2014-0057-DWQ). On _____ and again on _____, a city representative inspected your facility and determined that it is subject to the State Industrial Permit. You were notified by the inspector during both inspections of the need to file a Notice of Intent (NOI) for coverage under the Permit.

As of June 15, 2015, the city has not received confirmation of your filing an NOI for **insert facility**. Failure to seek coverage under the IGP could result in a mandatory minimum penalty of not less than \$5,000 per year of noncompliance pursuant to California Water Code sections 13399.30 and 13399.33. In addition, industrial facilities that discharge industrial stormwater without coverage under the new IGP are subject to fines up to \$10,000 per day of violation and \$10 per gallon of Stormwater discharge pursuant to section 13385.

If you have filed an NOI for coverage, please mail a copy of the NOI or the State Water Resources Control Board approval notice and Waste Discharge ID # (WDID) to my attention at the City of Camarillo. If you have not filed an NOI, the City is mandated by our Municipal Stormwater Permit to notify the Los Angeles Regional Water Quality Control Board (LARWQCB). If the city does not receive a copy of the NOI or Receipt of NOI letter/WDID # by July 1, 2015, the City will need to notify the LARWQCB of the failure to file.

For further information on the State Industrial Permit, please visit the following web site: http://www.waterboards.ca.gov/water_issues/programs/stormwater/industrial.shtml. Thank you for your attention to this matter. If you have any questions or would like to discuss this further, please call me at 805-383-5659.

Sincerely,

Anita Kuhlman
Stormwater Program Manager

Service Information:

Grassy swale/biofilter/grass strip, pervious concrete, etc.

- Needs removal of litter and debris
- Needs to be vacuumed
- Needs removal of accumulated sediment
- Reseed and/or apply mulch to damaged grass areas
- Other repairs/maintenance necessary: _____
- No Maintenance is needed at this time

Proprietary Devices

Hydrodynamic Separator: Type: _____

- Needs removal of litter and debris
- Needs removal of accumulated sediment
- Other repairs/maintenance necessary: _____
- No Maintenance is needed at this time

Catch Basin Filters: Type: _____

- Needs removal of litter and debris
- Other repairs/maintenance necessary: _____
- No Maintenance is needed at this time

Detention Basins or Percolation/Infiltration Basins – Percolation Basins

- Needs removal of litter and debris from banks and basin
- Repair erosion to banks and bottom
- Clean/repair inlet riprap and pilot channels
- Clean/repair outlet to prevent clogging
- Sediment accumulation of 25% or more of original depth (should be cleaned)
- Perimeter fencing needs repair
- Apply Mosquito abatement procedure
- Other repairs/maintenance necessary: _____
- No Maintenance is needed at this time
- Are there sufficient observation wells for percolation/infiltration basins

Other BMPs

- Trash Enclosure Clean
- Parking Lot Clean
- No Maintenance is needed at this time

RISK DETERMINATION: Sediment and Receiving Water Risk Level: One Two Three N/A

DEWATERING ACTIVITIES: Has a NPDES Permit been filed: Yes No N/A If yes, is the Permit on site: Yes No

YES	NO	N/A	INSPECTION CRITERIA
			1. SITE PLAN: Does the site plan reflect the project site's condition(s)?
			2. SLOPE EROSION MANAGEMENT: Are slope erosion management BMP's in place per the SWPCP/SWPPP?
			3. SEDIMENT TRAPPING: Are all sandbags, straw bales, and/or silt fences in place and are they functioning?
			4. SEDIMENT BASINS: If desilting or sediment basins are being used, are they functioning properly?
			5. SEDIMENT MANAGEMENT AT DRAINAGE DISCHARGE POINTS: Are the drainage discharge points reasonably free of any significant erosion or sediment transport?
			6. SITE SEDIMENT MANAGEMENT: Is sediment, debris, or mud contained within the site?
			7. PUBLIC ROAD SEDIMENT MANAGEMENT: Are ingress and egress locations to the construction area stabilized to prevent the tracking of construction materials offsite or onto impervious areas?
			8. MATERIALS MANAGEMENT: Are material handling and storage areas reasonably clean and free of spills, leaks, or any other harmful materials? Are materials properly covered/contained?
			10. DESIGNATED MATERIAL STORAGE AREA/STOCKPILES: Are all locations of temporary stockpiles or construction materials in approved areas? Are inactive stockpiles covered?
			9. TRASH CONTROL: Is trash properly contained and are trash containers covered?
			11. VEHICLE & EQUIPMENT MAINTENANCE: Are all the equipment storage, cleaning, fueling, and maintenance areas reasonably clean and free of spills, leaks, or any other harmful materials?
			12. PAINT, CONCRETE & SAW CUTTING WASTE MANAGEMENT: Are waste containment areas functioning?
			13. BMP IMPLEMENTATION: Has an effective combination of BMPs been selected for the project site?
			14. BMP INSTALLATION & MAINTENANCE: Are the BMPs identified on the SWPCP/SWPPP, and/or installed in the proper location according to plan specifications?
			16. BMP LOG: Is a log kept on site which indicates BMPs are being evaluated, maintained and/or modified in the event that they fail or are not appropriate?
			15. HIGH RISK SITES*: Has the project proponent's qualified SWPPP personnel inspected the site's BMPs during installation and weekly during the wet season (October-April)? <small>*High Risk Sites: Construction on 20% or < slope or directly discharges to Revolon, Beardsley, Calleguas or Conejo Creek.</small>
			17. ILLICIT DISCHARGE: Is non-stormwater runoff leaving the site?
			18. POST-CONSTRUCTION BMPs: Are devices being protected from construction debris? Post-Construction Devices: _____ <input type="checkbox"/> Covered Trash Enclosure <input type="checkbox"/> Confirm All Construction BMPs Removed <input type="checkbox"/> "Don't Dump" Markers Installed <input type="checkbox"/> Maintenance Agreement Recorded
			19. PUBLIC PROJECT (CIP) SWPPP/SWPCP: Does the SWPPP/SWPCP have the required training, weekly, storm, monitoring, REAP inspection records & photos (photos of discharge locations, BMPs, rain gauge, etc.)

Non-Compliance Issued:

Verbal Warning Notice of Violation
