Good morning Colleagues,

This letter is a summary of condition of the Assessment sites MC1 and LC1 as observed 11/25/20 for the Malibu Creek Watershed Trash TMDL.

The results are as follows:

MC1—This site was clear of any abnormal accumulation. I assisted the CCC by ensuring that staff observed the site boundaries. Only 1 piece of trash was detected.

LC1—This site had the remainder of vegetation removed so all areas in the debris basin were available for assessment and collection. The site was in optimal condition with 10 pieces of trash that were found and removed. I assisted CCC with the boundaries, the collection, and the counting.
