

# VENTURA COUNTYWIDE STORMWATER QUALITY MANAGEMENT PROGRAM

## REQUIREMENTS FOR A STORMWATER POLLUTION CONTROL PLAN

Prior to the issuance of any construction/grading permit and/or the commencement of any clearing, grading or excavation, owners of projects with construction activities that require a grading permit shall prepare and submit a Stormwater Pollution Control Plan (SWPCP), on the form provided herein, for review and approval of the [City Engineer].

The purpose of the SWPCP is to identify potential pollutant sources that may affect the quality of discharges and to design the use and placement of Best Management Practices (BMPs) to effectively prohibit the entry of pollutants from the construction site into the storm drain system during construction. Erosion and sediment source control BMPs should be considered for both active and inactive (previously disturbed) construction areas. BMPs for wind erosion and dust control are also included. The SWPCP may require modification as the project progresses and as conditions warrant.

The SWPCP shall be developed and implemented in accordance with the Ventura Countywide Stormwater Quality Management Program, National Pollutant Discharge Elimination System (NPDES) Permit No. CAS004002 and any other requirements established by the [City].

The applicant/owner is responsible for ensuring that all project contractors and subcontractors implement all applicable BMPs.
